## Commitment

Air Control recognises it must conduct business in a manner that protects the quality of the environment in our communities, we are committed to reducing emissions, minimising waste & preventing pollution.

This commitment extends to safeguarding the environment from the organisation's operations so far as is reasonably practicable.

Air Control will also endeavour to encourage & educate our customers to invest in heating, ventilating, air-conditioning & refrigeration equipment that is more environmentally sustainable.

## Objectives

- Incorporate objectives and targets into project planning, monitoring, and reporting processes;
- Pursue continuous improvement of environmental management system based on ISO 14001:2015;
- Ensure the availability of resources and skills to enable compliance with local environmental legislation and to meet, and where possible, exceed the client expectations for environmental management;
- Promote communication and consultation about environmental management;
- Ensure that all potential environmental risks are electively identified and controlled.

## Responsibilities

Management have the responsibility to provide a safe workplace by:

- Identifying the environmental aspects that are part of the work activities;
- Evaluate the potential impacts on the environments;
- Implement a management plan to prevent or mitigate those impacts;
- Establish and operate a monitoring and reporting program;
- Continually review, upgrade and improve the management plan.

Employees will be expected to:

- Work in a manner consistent with the achievement of the organisations environmental management objectives;
- Report all environmental hazards to their supervisor in a timely manners;
- Report any potential or suspected breaches of policies and procedures to their Supervisor or Manager.
